PAYMENT PROCESSING

globalpayments

Key Features:

- Built-in Contactless transaction processing
- Vivid colour screen
- Large, back-lit buttons for high visibility

iCT250 CounterTop Contactless

VIVID COLOUR DISPLAY WITH EASY-TOUCH KEYPAD FOR ENHANCED CUSTOMER EXPERIENCE

Global Payments introduces a new world of customer satisfaction with its iCT250 CounterTop Point of Sale (POS) terminal for processing credit and debit card transactions. Customers will appreciate the vivid colour screen and back-lit, easytouch buttons, especially in settings with low lighting. Restaurant customers will find it easier to complete their payment transactions on the iCT250 CounterTop using the built-in tipping options. The iCT250 CounterTop's sophisticated design simplifies communications connections and makes it easier to pass the terminal to the cardholder.

Ingenico® iCT250 Terminal

You have all of the benefits of high-volume transaction processing for contactless, chip, and magnetic stripe in a compact, feature-rich terminal. With the latest PCI PED 2.0–certification, your customers' transactions are completely secure. If you want to control access to tasks such as voids and refunds and other functions, the iCT250 CounterTop's password control feature enables you to assign up to four levels of passwords.

Whatever the demands of your business, Global Payments' iCT250 CounterTop will improve your customers' satisfaction and give your customers another reason to do business with you.

FEATURES	BENEFITS
Built-in contactless transaction processing	Allows customers to pay and go in seconds
Vivid colour screen and high-visibility buttons	Easy for customers to use in all merchant environments
Dollar amount and percentage tipping options	Customers have the option of applying a tip as a percentage of the bill or by entering a dollar amount
Simplified communications connections	Reduces cord clutter and makes it easier for customers and merchants to handle the terminal
